

# *The Palace at Weston Wins Gold!*

The Palace at Weston is proud to be a “Gold” Award winner! Our multi-sensory room in the memory care neighborhood earned top honors during the “Best of 55+ Housing Awards” at the National Association of Home Builders’ International Builders’ Show in Orlando.

Helen Shaham, president of The Palace Group, and her team researched memory care communities across the country and consulted with dementia specialists on best practices. A multi-sensory room was included at The Palace Gardens in Homestead and was proven to reduce anxiety and increase memory care residents’ comfort level.

In The Palace at Weston, the room includes a LED faux fireplace, a fiber optic waterfall, weighted blankets and rocking recliners. Soft fabric is used for wall treatments and covered walls, from floor-to-ceiling, giving the feeling of being in a cocoon.
